seems satisfied. With two fingers, he pulls down both lower eyelids and examines his eyes? God knows. "Peace," said Geneva. She raised her head and at last made eye contact. "Peace, and God knows you." "True," Hermann, the young man in the white labcoat, agreed. "But on top of that, parts of this place are used as a school to give the kids early off-planet experience. The lady who runs that side of it isn't here right now, but she'll be free later." "We've only seen Franklin," Pernak replied. "There's a whole planet out there." "Will the Chironians let him wait that long?" Colman asked. "Do they know he's in there and what it means?". Hunted and the Would-Be Chameleon. This isn't a published work, of course, although in the boy's mind, "You never asked me," Swyley answered over his shoulder. eyes and saw where they were focused. Not on her daughter. On the nearest end of the makeshift. "My mother's a little nuts about all things Hawaiian." "But what if he launches those weapons into orbit before issuing an ultimatum?" Bernard asked. That morning Paul Lechat, whom she had never thought of as especially noteworthy on any issue, had announced himself as a late candidate in the elections and called for the establishment of a separate Terran colony in Iberia, somewhere up in Selene. He wanted to allow the people from Earth to pursue their own pattern of living without disruptive influences for the immediate future, and possibly to make such an institution permanent if it suited enough people to do so. To Jean the announcement had come as a godsend, and to many others as well, if the amount of popular support that had materialized from all sides within a matter of hours was anything to go by. Why couldn't everybody see it that way? she wondered. It was so obvious. Why were there always some who were obstinate and valued political interests before what common sense said would be for the common good, such as Kalens, who even now was reacting to Lechat as a threat and rallying his own followers to action? Later that evening Bernard returned home from the shuttle base to find Jerry Pernak there. Pernak explained over dinner that he had reconsidered his opposition to Lechat's Separatist policy. He had heard from Eve that Jean was involved actively, wondered if Bernard was too, and wanted to cooperate. Celia nodded. "That evening, as soon as I got up to the ship. I think I must have been hysterical or something. But yes, I told him." firmly fixed in carved-out chunks of jawbone, gums attached. Nevertheless, though just a boy, he is. "She was a danger to me in the yard, all that screaming about hag of a witch bitch and spellcasting and." "I know ladybugs," Noah said. "They all love the night." Bernard frowned suddenly. "Yes, it is. And I didn't know about it." His concern intensified as the implications sank in. "Who are they?". But Kalens seemed to have lost touch with the reality unfolding inexorably around him. He continued to exhort his nonexistent legions passionately to a final supreme effort, to give promises and pledges to an audience that wasn't listening, and to paint grandiose pictures of the glorious civilization that they would build together. He had chosen as his official residence a large and imposing building in the center of Phoenix that had previously been used as a museum of art and had it decorated as a miniature palace, in which he proceeded to install himself with his wife, his treasures, and a domestic staff of Chironian natives who followed his directions obligingly, but with an air of amusement to which he remained totally blind. It was as if the border around Phoenix had become a shield to shut off the world outside and preserve within itself the last vestiges of the dream he was unable to abandon; where the actuality departed from the vision, he manufactured the differences in his mind. "Mike," Colman said to him as they stopped by the door. "Take these two people inside and fix them up with coffee or something, will you. Jay, wait inside with Veronica. I have to get back in with Bret, but I'll be back in a few minutes. Don't worry. It'll be okay." "Healing technology," Leilani corrected. Expressions, yet his smile was broad and winning. "I put a lot of things loose, you know?" "I know." "I think they're all just breeding grounds for legionnaires' disease and that gross flesh-eating bacteria," continued rinsing dishes as she said, "Not riddles exactly. Sometimes there are things we can't easily talk." Nanook sighed heavily. "We have had one or two things like that from time to time," he confessed. "But it never lasts. In the end a bigger bunch gets itself together and gets rid of them. It comes to the same thing--they end up getting shot anyhow." "They could dock shuttles at the ports in the Battle Module and come through the Spindle," someone pointed out. "The boy is athletic, agile. The leap from the porch roof is a challenge easily met. He lands on the lawn used the restroom only a short while ago." "I'm glad I wasn't alive then," Marie said from behind him. "I can't imagine whole cities burning. It must have been horrible." "I held up a hand. "Yes, yes, we have been through all that." "Hope, however, isn't all that's needed to achieve change. Hope is a hand extended, but two hands are." "Fear implies respect," Leilani said. "For a while after listening to Lechat, she had entertained a brief hope that his announcement might precipitate a landslide of opinion that would force a more enlightened official policy, but the hope had faded a mere two hours later when Eve and Jerry stopped by for a brief farewell before moving out to take up the Chironian way of living. Apparently many people were doing the same thing, and there were even rumors of desertions from the Army; Jean had been unable to avoid feeling that Eve and Jerry were somehow deserting her too, but she had managed to keep a pleasant face and wish them well. It was as if Chiron were conspiring against her personally to tear down her world and destroy every facet of the life she had known. "It's getting to you too," she whispered tightly. "Just as it's already gotten to Eve and Jerry. Oh, how I hate this place! Can't you see what it's doing to us all?" "If she was dumb enough not to, she wouldn't have been there in the first place," Juanita added, trying to be helpful. Chapter 11. "I knew they were faithless, shiftless," Geneva continued. "Two big SUVs, modified for police use, with racks of rotating red and blue emergency beacons on their roofs. Repeatedly clenching and relaxing his right hand, as though he were troubled by joint stiffness after long. "Baby, baby," Sinsemilla said, "look at this, look, look. Baby, look, see, look." She extended her hand, "This planet has escaped such a fate until now, but its population will grow. It has a chance to profit from what Earth has learned, and to plant the seeds of a strong, unshakable order now, before the diseases of disunity have had a chance to germinate and become virulent. The same forces that are already unleashed upon Earth are only two years away from reaching Chiron in the form of the vanguard of the Eastern Asiatic Federation. In just two years' time, your choice will be either to submit to the domination of those who would enslave this planet, or to confront them with a unified strength that would make Chiron impregnable. Your choice is weakness or strength servility as opposed to dignity; slavery as opposed to freedom; ignominy as opposed to honor; and shame as opposed to pride. Weakness or strength. I offer the latter alternatives." "Read about him. You'll see." "It wasn't quite the answer that Celia had been prepared for. She frowned for a second, then reached for her glass. "The reaction that it might provoke worries me. So far the Chironians have been playing along, but nobody has tried to throw them out of their homes before. We've already seen examples of how they do not hesitate to react violently." "Softly along a brass rod, as though the hanging skeleton, animated by sorcery, is flexing its bony fingers in." "Listen, Aunt Gen, one of the things that kept me from going nuts all those years was you, just the way." "Dr. Doom. They've been together four and a half years now. See, there's even kismet for crackpots." "If I were you, I wouldn't invite him to dinner. By the way, he doesn't know I'm here. He wouldn't allow. Don't you go on after the others. I'll catch up later." "You don't want me around?" "Recently met and therefore are still in the process of becoming a fully simpatico boy-dog unit. "I've been to take a look at their university and what they do there. You wouldn't believe it. And I've already got a position if I want it, for no other reason than that people already there say it's okay. You get a house, for nothing . . . a good one. Or they'd build you one however you want it. How can you say no? We're going to become Chironians. And so will everybody else when they've gotten over the voyage. Then people like Kalens can yell all they want, but what can they do if there's nobody left to take any notice? It's as I said--you have to start thinking like Chironians." Chapter 2. Leilani wore khaki shorts. Her right leg was fine, but in the cradle of steel and padding, her left leg. In the yard next door, beyond the sagging picket fence, a white-robed figure thrashed in the gloaming, as. Having lit three candles on one match, Micky shook out the flame before it could singe her fingers. "This, at least as long as my pseudofather keeps her supplied with drugs. For a few seconds Bernard and Lay were too stunned to say anything. "But... that's crazy," Bernard protested at last. "You can't just let everybody go round shooting anyone they don't like." "At the foot of the steps, he's paralyzed by dread. Perhaps the killers are already here. Upstairs. Waiting." "A highly efficient directional microphone was synchronized with the camera," Noah explained. "We've appropriate of all her mother's fragrances." "The best thing would be to blow that door with a salvo of AP missiles before we move, and hope they jam it open," he murmured to Swyley, who was lying next to him, examining the far bulkhead through an intensifier. "I have listened to and considered the objections, but I think the prevailing view of most of us has made itself clear," Wellesley said. "The policy that we have attempted has not only failed to achieve its goals and shown itself incapable of achieving them, but it has culminated in an act which we must accept as a first manifestation of a threat that affects all of us here as potential future targets, and in the alienation of our own population to the point where many find themselves not unsympathetic to those for whom that threat speaks. Any government seeking a continuance of such a policy would constitute a government in name only..'-That could be a good place to start," Kalens suggested to Wellesley.'
