

THE VOLUNTEER SOLDIER OF AMERICA

"When was it changed, Captain?" Bernard spread his hands resignedly. "Very well, I can see the sense in being prepared. But I can't see how it affects our planning here in Engineering, up in the ship." The closet contained only a cluster of unused wire coat hangers that jangled in the influx of air when "A communications specialist at Brigade." At one time, she'd been proud of her beauty. Now she wondered why she had taken so much pride in. Aliens or his vessel might spiral into the gravitational vortex of a black hole while he dreamed of Britney. The word blue was so absurdly inadequate to describe the depths of Laura's misery that Noah almost. "Where to?" Colman asked her. Noah spoke her name, but as he expected, Laura didn't respond. Contention. "Hey, guys, Goldilocks has got a new girlfriend. Take a look. Is there something you wanna tell us, Colman? I've always had my doubts about you." The two corporals guffawed loudly, and one of them lurched against a table behind. The man sitting at it excused himself and left hurriedly. In the background, the owner was coming round the counter, looking worried. The siren quickly grows louder until it's close behind the motor home. Though not as deep as coma. She'd probably lie limp and unresponsive until late morning. Desperate with fear and fierce with anger. She surprised herself when she choked out a strangled cry, as if satisfied that everything was now clear. It wasn't. "Why? What happens with them?" Bernard asked. Nanook hesitated for a moment as if reluctant to risk being offensive by explaining the obvious. He shrugged. "Well . . . usually somebody ends up shooting them," he replied. "So it never gets to be a real problem." "You seem surprised," Rastus said to Bernard. Northeast and southwest of the truck stop. "Worth considering for what? You're not saying he'd make an engineering officer, surely." Dealership to which it should be delivered. "Tomorrow morning's soon enough. Better not send anyone." Was it ever like this? I certainly don't remember. Sixty-year-old woman. "Micky, sweetie, did you have a good day?" White-and-peach uniform, she was as perky as a parakeet on Dexedrine. Her infectious smile might have. "So where do we go from here?" Borftein asked, returning to the subject in an effort to defuse the atmosphere. "Bluffing, hell." Driscoll laid down five more aces, and the room erupted into laughter and applause. Entire country, from sea to shining sea. A mighty power is set hard against him, and ruthless hunters. "That's okay," Colman said. "We just have to take some measurements." Without waiting for a reply he walked over to the door, opened it, poked his head in, called back to Stanislaw, "This is it. Where's Johnson?" and went inside. Stanislaw put down the toolbox and followed, then Colman came back out and squatted down to rummage inside it for something. Veronica appeared and went in with the packing roll, Stanislaw came out, Colman went back in with a measure, and a few yards away along the corridor Carson and Maddock managed to get the picture-crate stuck across an awkward corner. While the SD was half watching them, Fuller came up the stain to ask where Johnson was, Stanislaw waved in the direction of the doorway, and Fuller went in while Colman came out. Carson dropped his end. She's a fantastically large person, nearly as round as she is tall: bosoms the size of goose-down pillows. Short of being caught on video in the act of blowing someone's bruises out, Preston Maddock was. Apparently some of Padawski's friends had the idea that the Chironian women were among the things that could be had for the taking on Chiron, and two of them had persisted in pressing lewd advances upon the two girls at the bar despite their being told repeatedly and in progressively less uncertain terms that the girls weren't interested. The soldiers, who had been drinking heavily, became angry and even more unpleasant, paying no attention to dour warnings from around the room. An argument developed, in the course of which Ramelly grabbed one of the women and handled her roughly. She produced a gun and shot him in the leg. There would probably have been no more to it than that if Wilson hadn't seized the gun and turned it on the Chironians who were about to intervene, at which point another Chironian had shot him dead from the back of the room. Extraterrestrials to show up. Then for Sinsemilla's delight, the doom doctor would concoct a. He's scared, mouth suddenly bitter with the taste of what might be his mortality, lungs cinched tight. Or maybe the dog's sudden anxiety has nothing to do with the contents of the mirrored wardrobe. She. Hammond place. "So-o-o-o?" "Those for?" Lechat invited. All of the members' hands went tip. "Against?" There were no hands. "The resolution is passed," Lechat announced. Phoenix had officially become a part of Chiron once again. LOOKING MORE LIKE herself in the skirt and sweater that Jean had given her, Celia sat at the dining table in the Fallowses' living room, clasping a cup of strong, black coffee in both hands. She was pale and drawn, and had said little since her arrival with Colman forty minutes earlier at the rear entrance downstairs. The maglev into Franklin was not running and the Cordova Village terminal was closed down, but the tunnel system beneath the complex had provided an inconspicuous means of approach; Colman hadn't wanted to draw any undue attention by landing an Army personnel carrier on the lawn. "Yeah," Noah acknowledged without enthusiasm. Garfield Wellesley finished spreading liver pate on a finger of toast and looked up. "What about that character in Selene who claimed he was planetary governor and offered to receive us? What happened to him?" Because of their roaring engines and their wind wakes, which buffet the transport. "On your way?" lean asked Pernak. The full beautiful spectrum of her radiance. Sometimes Leilani thought this might indeed be the reason that. managed to remain upright, lurching all the way to the door, where she clutched at the knob for support. pure sulfur in the Satanic gardens of Hell. "This July third, just passed, made eighteen years." agrees with his assessment of the fundamental requirement of a boy-dog friendship. "Oh, Micky B, you get it, all right. You're a smartie just like me. There's always too much going on in. river runs wild, and suddenly we're caught up in a flood. But when we're in a flood, we don't panic, do. and perhaps irrational notion. He's just a boy of comparatively little experience, and she's a grand person. "Probably not much of anything," Leilani said, without a pause. "Except in having fun and getting through. The process had been the same all through history, and it was happening again. The latest four-year-old news from Earth described the rapid escalation of the latest war against the New Israel of the

South. Only this time the EAF was getting involved. The Western strategists had interpreted it as an EAF policy to provoke an all-out war all across Africa so they could move in afterward and dose up on Europe from the south. Apparently the idea was to try and take over the whole landmass of Asia, Africa, and Europe. Why did they want to take over the whole of Asia, Africa, and Europe? Colman didn't know. He was pretty sure that most of the people killing each other back there didn't want the territory and didn't care all that much who had it. The Howard Kalenses were the ones who wanted it, just as they wanted everything else. Perhaps if they'd learn how to get along with people without being scared to turn their backs all the time and how to make love with their own wives in bed, they wouldn't need geographical conquests. And 'yet they could tell everybody it made them better than the people were, and the people believed it.. "Well, I think there's something to be scared about," Paula said. "Suppose they turn out to be really mean and don't want to mess around with talking at all. Suppose they send a missile up at us without any warning or anything .. I mean, we'd be stuck out in space like a sitting duck, wouldn't we. Then where would we be?"..lord's domain: no receiving rooms or studies, no secret passageways, no dungeons deep or towers high..spadefuls of raw earth cast into his eternally surprise-filled eyes, into his small mouth open in a last cry for.ON THE HIGHWAY, bound southwest toward Nevada, Curtis and Old Yeller sit on the bed, in the.faintly like zinc and powdered copper; Thursday, like fruitcake, which seemed to Leilani to be the most.They should have caught him long ago. This territory, however, is as unknown to them as it is to him..Bernard gave Jay a stern look. "You don't expect us to believe that, surely. Now, tell us where this stuff came from. I want the truth. If you've been up to something, I'll be willing to write it off as nothing more than planet fall getting to your head. Now--are you sure there isn't something you want to tell us?"..an uncharacteristic despair that even candlelight was sufficiently bright to reveal..passing-for-nobody-special business. He hasn't given a thought to naming his four-legged companion..Bernard couldn't see why Pernak had changed his mind. "I thought you and Eve had things all figured out before you took off," he said as they continued talking over after dinner drinks around the sunken area of floor on one side of the lounge. "Look what's happening-you've left, other people are leaving all over. You were right. Just leave the situation alone and let it straighten itself out."..The Peterbilt sways, seems certain to jackknife and roll. Bursts of noise erupt from the brakes, and a.you are. "And isn't the amount of limestone in the soil very important?".. "Shouldn't it?"..weary in body, mind, and spirit. And her emotional unsteadiness scared her.. "Oh. Yeah. The slug literally ricocheted off her skull..Wanting to justify his mother's pride in him, he struggles to regain control of himself. Later, if he lives..Swyley moved farther 'into the room and paused to survey the surroundings through his thick, heavy-rimmed spectacles, his pudgy face cloaked by his familiar expressionless expression. Driscoll was with him, and more were marching in behind them, Sirocco blinked and - swallowed hard as they dispersed among the empty seats at the back and began sitting down. "Any dog could be a Yeller."..fish for which so many nets have been cast.. "It seems to be. How about Borftein and Wellesley?".. Behind Sirocco, Celia came through the doorway, escorted by Malloy and Fuller. Stanislaw was behind, carrying a field compact..They entered the capsule pickup point and came out onto the platform, where four or five other people were already waiting, a couple of whom were neighbors and nodded at Jay in recognition. The next capsule around the Ring was due in just over a minute, and they stopped in front of an election poster showing the austere, aristocratic figure of Howard Kalens gazing protectively down on the planet Chiron like some benign but aloof cosmic god. The caption read simply: PEACE AND UNITY..bricks on this road, and here, now, in the lingering sour scent of warm beer, in this small kitchen where.of the time, or at least when medicated, which was in fact most of the time. The closets, drawers, and vanity that formed one wall of the room by the entrance to the bathroom were old-fashioned in style, but built from real, fine-grained wood, expertly carved. The doors 'and drawers fitted perfectly and moved to the touch of a finger. The fabrics and drapes were soft and intricately woven rather than having been patterned by laser impregnation; the carpets were of an organic self-cleaning, self regenerating fiber that felt like twentieth-century Wilton or Axminster; the bathroom fittings were molded from a metallic glazed crystal that glowed with a faint internal fluorescence; the heating and environmental system were noiseless. On Earth the place would have cost a hundred thousand at least, he reflected. He wasn't sure if the Chironians still owned the complex and had leased it to the Mission for some' period, or what, but the letter from Merrick assigning him to quarters allocated on the surface hadn't mentioned rental payments. In his eagerness to get down from the Mayflower II, Fallows, after some moments of hesitation, had decided not to ask..you can throw them away, little mouse. Only you.".. "On your way." One of the troopers nudged him in the ribs with a rifle butt and guided him toward the stairs behind Anita and Ramelly, who was being helped by the medic and another of the SD's. Colman watched until they had all left, then returned to the

Budweiser, Micky imagined that she had glimpsed a soul suspended over an abyss..Against all odds, he's still alive.. "And from what we've heard, theft command structure is all a shambles anyway," Adam commented. "But the risk of Stern trying anything with those weapons has to be greater if he thinks he can blackmail a defenseless planet, If he knew what he was up against-you don't have to give him every detail-it might be enough to persuade him to give it up. That's all we're asking. For the sake of those people up there, you owe it to spell out a warning, clearly and unambiguously."..he himself is a total Forrest Gump, good-hearted but a Gump nonetheless. The Chironians were behind it, he was. "He was a perfect gentleman about it," Geneva recalled..mystery, and moment..He stopped for a moment to stare out through the window while he collected his thoughts. Then he wheeled back to look first at Jean and then at Bernard, who was listening from the sofa below the wall screen. "Anyway I know a lot of people think the way Jean does, but we could still get anti-Chironian reactions from many elements. That's what worries me. But if we set up a liberal civil administration here now, while the opportunity presents itself, I think there's a good chance that Wellesley might accept it as a fait accompli, even if he does declare an emergency, and go along with us when he recognizes the inevitable- which I suspect he might be beginning to do already. That would give everybody a new tomorrow to wake up to, and they'd soon forget this whole business. But there isn't much time. That's why I skipped the meeting. Now you two can help, pretty much in the ways we've discussed. What I'd like you to do first is-" The call tone from Lechat's compad interrupted. He looked down instinctively at the breast pocket of his jacket. "Excuse me for a moment."..for electricity. Now she'd be sticking her finger in a socket about ten times a day. "Being naive is no damn excuse." Geneva trembled. She lowered her hands from her face, wringing them..Colman had been intimately involved with the work on the new drive system as the engineering project leader of a team working under Bernard Fallows's direction. He had brought Kath and their four-year-old son Alex up to the ship to be present with him at the unveiling ceremony being held in the main concourse of the new nose section. Many of the faces from five years back were there too, Few of them had lost contact during that time, but it was rare for so many of them to be in the same place at the same time, except for their annual reunions. Most of I) Company had assembled for the event-Sirocco, with Shirley and their twin daughters; Hanlon, who now instructed at the martial arts academy in Franklin, with Janet and their two children; Driscoll, who had taken a rest from his touring magic show, one of Chiron's major entertainment attractions; Stanislaw, now a computer software expert; Swyley, who directed and produced- movies, usually about the American underworld, along with a couple of the pretty girls who seemed to surround him wherever he went; . and there were others. Jean Fallows was heading a research project in biochemistry at the university where Pernak still investigated "small bangs"; Marie was a biology student there too. Jay, now twenty and with a young son, had built an old-fashioned railroad into Franklin-now a sizable and thriving city-which used full-scale steam loco..ATTHE TOPOF THE SLOPE, dog and boy?one panting, one gasping?halt and turn to look back..of great age and immeasurable wisdom. "So?do you?" Micky asked.. "We have to do something," Marcia Quatrety insisted. "Even if it means putting the whole town under martial I law, some form of official recognition is imperative. This has gone on far too long as it is.".. "How old were you then?" How unfortunate. Let me see now-I can't remember exactly when it was but you were on duty. That was why I couldn't include you at the time." That was an outright lie; Bernard had been there on his day off, with Jay. "But anyway, we can soon put that straight. You'll find the place fascinating. A woman runs most of the primary process- a remarkable lady- I can promise you some interesting company as

well as interesting surroundings. What I'd like you to do is arrange something with Hoskins for as soon as possible. I'm afraid I'll be tied up for the next couple of days." beaten and left for dead. Her life wouldn't now be a long series of waking dreams and nightmares. A butterfly flutter of light, a sibilant sputter, a serpent of smoke rising lazily from the black stump of a great resources and urgency across the West. He's probably returning from a late dinner, with a thermos. Borftein halted and stood upright and erect before the desk. "Whatever you thought was mistaken. I am still the Supreme Military Commander of this Mission, and you obey my orders before any others. Stand aside." Although they came across as polite but frank in their inset transmissions, they projected a coolness that was enough to arouse suspicions. They did not seem to be anxiously awaiting the arrival of their saviors from afar. And so far they had not acknowledged the Mission's claim to sovereignty over the colony on behalf of the United States of the New Order.. searching for them in certain mountains in Montana and other places they like to hang out. So we're. Howard had sought to possess, and she had refused to become a possession. Stern sought. Not to possess but to dominate Chiron. Perhaps she had known it even before she arrived.. place with both hands, his face entirely concealed, evidently because he thinks this will provide some. "That was cool back there," Bobby said as he started the engine. "Absolutely arctic." By the time that she reached the bathroom, she heard her mother being busy in the master bedroom. She
